

SHADY UNIVERSITY – A Fall Hosta Retreat

2017 Dixie Regional Hosta Society Meeting

Photography Contest

You do not need an expensive camera. Cell phone and point-and-shoot cameras would take great photos, too. Just take lots of photos throughout the season and bring your best to share!

Categories:

1. **Hosta Leaf Detail** – Walk up closer to your favorite hosta. Focus on a single leaf or a few leaves and capture the coloring, veins, texture, edging, etc. in detail.
2. **Entire Hosta Clump** – Walk around your favorite mature clump. Stand and look down, bend down, kneel down or even lie down on the ground, and capture the whole plant from the best angle.
3. **Hostas in a Group** – Capture your favorite hostas, mass plantings or groupings, focusing on the best mixture of colors, sizes, texture, etc.
4. **Hosta in Garden Landscape** – Focus on your favorite hosta or hostas blending with other plants, garden structures or non-plant accessories.
5. **Artistic Hosta Photo** – Turn on your creativity switch. Your hosta photo may include flowers, scapes, petioles, odd shape leaves, your pet, creatures, wild animals, ... and so on. You can even create a new hosta variety in your photo lab (with the help of software such as Photoshop)!

Rules:

- Photos are to be 8 x 10 in size, on glossy paper, and no matting or framing.
- Photos may not contain any name, date or watermark.
- You can enter one photo per category and as many categories as you like.
- All photos must have your name, category number and hosta names (Cat #5 optional) on the back. Please also fill out the form below.
- Please submit the photo(s) and form at the registration table. Photos submitted as an email attachment is not accepted.

Looking forward to seeing your favorite photos!
